

LOG HOME CONCEPT

## INDIVIDUAL LIFE STYLE

Create your own unique home with our solutions that are included in the standard delivery or modify the design with our collection of additional products.

We have delivered homes to every continent, to 48 countries so far, and specialize in tailor-made designs. There are as many different Artichouse homes as there are our customers.

# WHAT WILL YOUR HOME LOOK LIKE?

THERE IS PLENTY TO CHOOSE FROM WITH ARTICHOUSE

The internal finishes can be chosen between be our rustic log paneling, ceiling paneling and floor boarding. Different atmospheres can be created by staining the wood to the color you choose. The walls and ceilings can also be plastered and painted to the color you wish for, if the paneling is replaced by gypsum board.

These two cabins are very similar in design, but the interior atmosphere is different because of the different treatment of wooden surfaces and choice of furniture. The plastered walls emphasize the wooden framed windows.

# ARTIC LOGS

## CROSS CORNER

The cross corner is the traditional corner joint for log homes. We have improved the old design of the cross corner joint and include this improved Artichouse cross corner as a standard joint for all our log homes. The cross corner can be machined to the following log profiles:

*Laminated logs*

Compatible WITH CROSS CORNER, TIROL CORNER

LH 95 x 170 T

LH 135 x 170 T

LH 180 x 170 T

*Laminated logs*

Compatible WITH CROSS CORNER, TIROL CORNER, NEO CORNER

LH 135 x 275

LH 205 x 275

LH 275 x 275

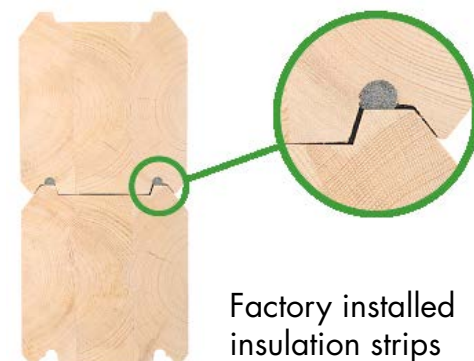

## TIROL CORNER

The Tirol corner gives the building a distinctive look with the dovetail joint. This joint is the modern version derived from the carpentry tradition of Austria. The Tirol corner can be machined to the following log profiles:

## NEO CORNER

The Neo corner is our most recent addition to Artichouse log corner joints. This special joint serves more modern architecture and gives the corners a minimalistic look. The Neo corner can be machined to the following log profiles:

Factory installed insulation strips

*Non-settling logs*

Compatible WITH TIROL CORNER, NEO CORNER

LH 135 x 275 P

LH 205 x 275 P

LH 275 x 275 P

# DOOR SELECTION

The exterior doors complement the architecture of the house and should be in harmony with the overall design: it should look inviting on the outside and be a natural part of the entrance hall on the inside.

Here are two examples of the same door design - other is painted with a dark grey paint and the other has a translucent treatment

A vast selection of handles is available. The door handles are of similar design as the window handles. Lockable handles will be delivered for our UK deliveries.

# HERE ARE EXAMPLES OF THE VARIOUS DOOR DESIGNS WE CAN SUPPLY

Horizontal paneling makes the doors seem wider than they are

Lattices can be included in all door designs with a window

Vertical paneling gives the external doors a more narrow appearance

Fishbone pattern gives the doors a distinctive look

There are also various custom designs available

# TERRACE & BALCONY DOORS

Terrace doors create an unobstructed access between the warm area and terrace of the house. There are multiple different designs available: double doors, sliding doors and folding doors.

Double doors are the easiest of doors for children to use and suit very well for traditional designs.

Sliding doors frame the outside view beautifully without having such thick frames as double doors.

*\*Standard:  
wooden surface*

*\*Additional:  
aluminium cladding*

Folding doors can be opened and retracted fully to create a large open passage on warm summer days. Our customers are always free to choose the terrace door of their preference.

# INTERNAL DOORS - STANDARD

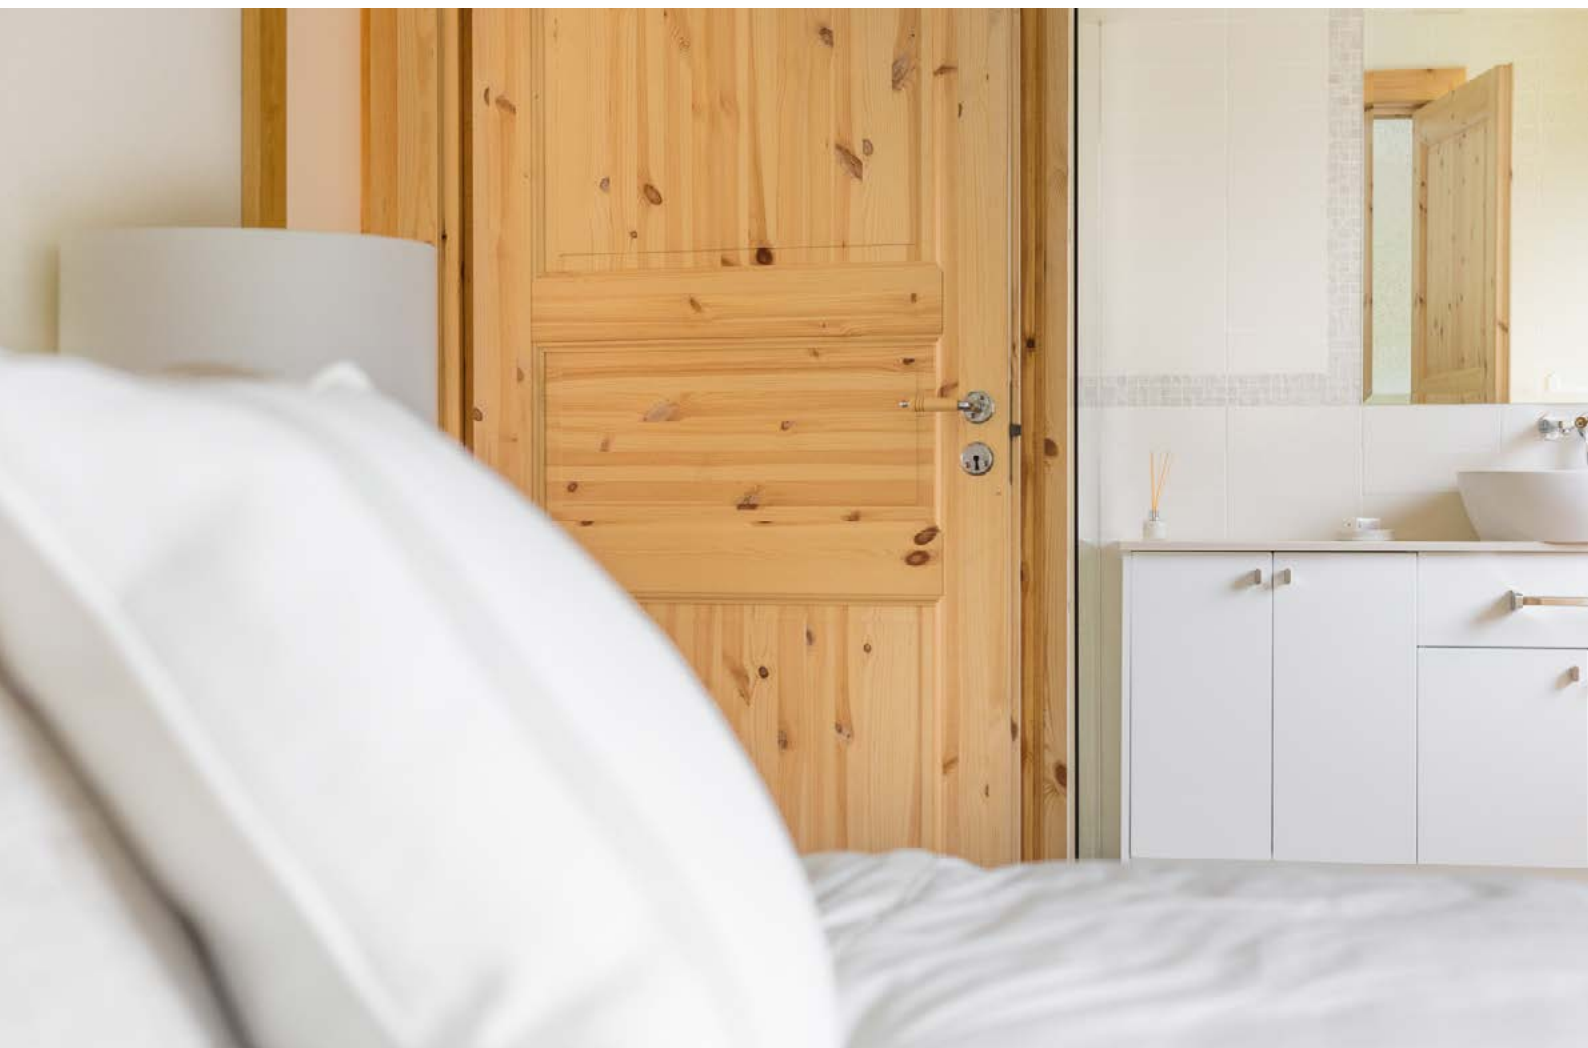

Our internal doors complement the other wooden surfaces of the house. The massive pine doors can be delivered untreated or lacquered and there is a vast selection of handles available. By default, the standard internal doors are treated with a clear lacquer.

\*Standard

Tradition 51   Tradition 53   Tradition 54   Tradition 52   Tradition 55   Tradition 58

Our standard handle is shown in this picture, metal lever with a wooden handle.

# INTERNAL DOORS - RUSTIC

The rustic internal doors are also made of massive wood. The modern sleek design and soft opaque colors create an interesting contrast. The door is impact resistant, sturdy and durable.

# SLIDING DOORS (INTERNAL)

A 40 mm thick sliding door leaf with rectangular edges, chromed round recessed handle and a pull ring on the side. Available sizes: 725x2040mm, 825x2040mm, 925x2040mm - wider doors up to 1200mm by additional order.

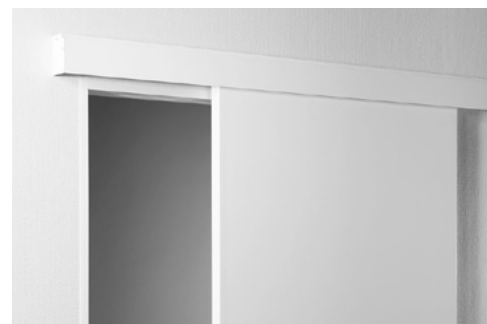

*A custom ordered black internal door with RETRO-mechanism suits very well this rustic setting.*

Our standard internal sliding door is the Unique 401 door. Most of the door designs from previous pages can also be made to be sliding doors.

The standard sliding mechanism included in the price is covered with white casing.

# SLIDING DOOR (INSIDE THE WALL)

By additional order, we can supply sliding doors which slide inside the frame wall structure. Soft-close mechanisms and locks for bathrooms are also available.

By default, the door is supplied with a recessed handle and a rounded metal ring machined to the side of the door.

# CEILING

Our standard surface material for ceilings is a pine paneling, which matches with the interior log and log panel surfaces.

White waxed ceiling. Depending on your wishes, we can also design and supply the stairs painted or varnished to the color of your choice. The color of the stairs can reflect the overall color scheme of the room.

Depending on the structures of your Artichouse, the interior surfaces can also be plastered.

The pine panel creates a cozy feeling to rooms with a vaulted ceiling. This standard paneling also matches perfectly with other pine surfaces in your home.

By an additional order, we can supply white lacquered ceiling panel & mouldings.

# FLOORING - PINE FLOOR BOARDING

Our standard floor material is pine floor boarding.

The standard pine floor boarding is a great choice for anyone who wants the majority of internal wooden surfaces to match with each other. The floor boarding is supplied with a natural wooden surface - without any chemical treatments - just like our logs. It should be sanded and treated with the surface treatment of your choice (oil, oil-wax, lacquer or similar.) Wooden flooring is always suitable only for dry areas, not bathrooms.

Stone flooring is always a local purchase and does look lovely with the logs by creating more contrast.

# FLOORING - PINE PARQUET

By additional order, we can supply engineered pine parquet suitable for underfloor heating.

This material is 14,5cm wide, slightly wider than the standard 9,5cm wide floor boarding.

The engineered pine parquet is supplied with a natural wooden surface - without any chemical treatments - just like our logs. It should be sanded and treated with the surface treatment of your choice (oil, oil-wax, lacquer or similar.)

# STAIRS

The standard Artichouse stairs are made of sturdy Finnish Pine, just like our log walls. The standard surface treatment is clear varnish. Our stairs are always designed to be safe and easy to use.

Contrast can be created by staining the steps to a darker color.

The pine stairs can also be supplied with glazed railings.

White painted stairs with glazed railings

# ARTICHOUSE WINDOWS

Our windows are always finished to the highest standard. Northern, slow-grown pine is a great material for the windows because of its high durability. Trickle ventilators can be installed to all windows if this is locally required.

Our standard window is a double glazed DK-window. These inward opening windows can be tilted from the top or opened completely to the side.

*\*Standard*

We can supply also triple glazed and aluminium clad windows if your building site is exposed to heavy driving rain and low maintenance is required.

*\*Additional: DK 3*

*\*Additional: DK 2 ALU*

*\*Additional: DK 3 ALU*

A vast selection of handles is available. The window handles are of similar design as the exterior door handles. Lockable handles will be delivered for our UK deliveries.

# FIXED WINDOWS

Sliding doors frame the outside view beautifully without having such thick frames as double doors.

The bay windows in our Tunturi designs create a beautiful view

# ADDITIONAL PRODUCTS: EXTERIOR TREATMENT

We can include Tikkurila treatments for the external treating of wooden surfaces of your home. The water soluble Valtti Akvacolor & Valtti Base (for priming) are by far their best products for external wooden surfaces. There is a wide range of colors available. Digital monitors and displays always distort the colors to a certain extent, please ask for a color chart and we will send it to you by mail.

## VALTTI AKVACOLOR BY TIKKURILA

# ADDITIONAL PRODUCTS: ROOFING

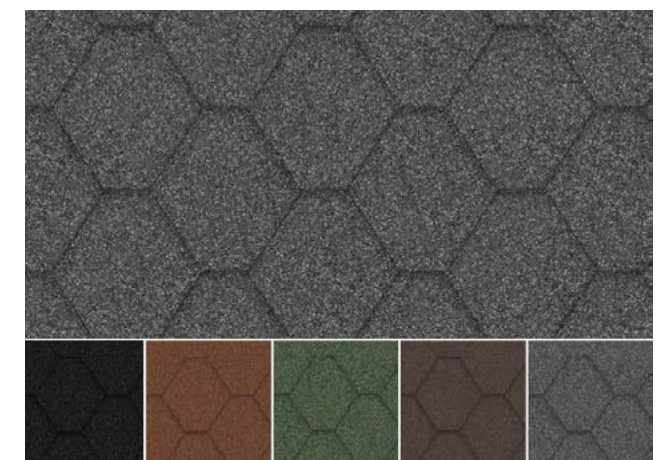

We can supply a top of the line roofing system from the Finnish manufacturer Icopal. Our roofing kit includes Icopal bitumen felt with accessories:

- Plano XL or Plano Pro bitumen felt
- Plano Pro Combi (ridge/eaves strip)
- Plano (underlayment) TL4
- Tin plates for eaves – sides & gables
- Rubber bitumen glue for eaves

The wider rectangular Plano XL is available in graphite grey and black anthracite.

The octagonal Plano Pro is available in multiple colors
